Figure 1 is a line graph showing the relationship between the percentage of total effort and the percentage of total catch for various fish species. The x-axis represents the 'Percentage of total effort' (0 to 100), and the y-axis represents the 'Percentage of total catch' (0 to 100). The species plotted are Yellow perch, Rock bass, White perch, Striped bass, and others. The graph shows that Yellow perch have the highest catch percentage for a given effort level, while Rock bass have the lowest. The legend indicates that the solid line represents the 'Percentage of total catch' and the dashed line represents the 'Percentage of total effort'.
